**A:** Bizerte, Tunisia

**Dear hiring team of Faurecia,**

I am writing to express my interest in the position of .NET/Angular Developer, as advertised. With a strong background in software engineering and extensive hands-on experience in .NET and Angular, I am confident in my ability to contribute effectively to your team.

Currently, I am in the final year of my computer engineering degree and am concluding my internship at Naxxum, where I worked on the Lumina project—a web and mobile platform dedicated to managing school life. This project has enabled me to develop deep expertise in .NET and Angular, as well as gain familiarity with modern architectures such as microservices, CQRS, and clean architecture. Additionally, I integrated the Identity Framework for authentication, strengthening my knowledge in application security. My end-of-studies internship ends this month, making me available to join your team very soon.

In addition to my current studies, I hold a Bachelor's degree in Computer Science from ISET Nabeul. My experience at Naxxum has equipped me with essential technical and methodological skills, while allowing me to work effectively in a team and follow agile methodologies. Passionate about developing innovative solutions, I am convinced that my profile perfectly matches the requirements of the advertised position and that I could bring significant value to your projects.

I would be delighted to discuss my application and qualifications in more detail during an interview. Thank you in advance for considering my application. Thank you for considering my application. I look forward to the possibility of contributing to [Company Name]'s continued success as a Computer Engineer intern.

Sincerely,

Mohamed Aziz Makri
